Tuftel 2311

The New Generation of Heavy Duty Headset Telephones
for Ships, Machinery Rooms, Railways, Tunnels etc

The **TUFTEL 2311** Series of Telephones are suitable for ships, airports, tunnels, power stations, railways, roads, machinery rooms, quarries and other extremely noisy environments. The **TUFTEL 2311** is one of a range of specialised telephones and is manufactured by Arnesys to exacting standards. They feature

- * Weatherproof and extremely rugged construction
- * Safety & Corrosion resistance due to their non-metallic case
- * Solid State Electronics throughout
- * Highly reliable operation & low cost of ownership
- * Many options to suit your exact requirements

The **TUFTEL 2311** has been designed using the latest technology.

The **TUFTEL 2311** is compatible with a wide range of networks ensuring clear speech quality at all times.

FEATURES

The **TUFTEL 2311** features

- an attractive black enclosure, which can be wall/post or desk mounted
- a very low Total Cost of Ownership with a high MTBF and low MTTR due to its extremely rugged construction, advanced concepts and reliable components
- the ability to add a variety of beacons or hooters
- electrical connections which may be brought in through a standard gland
- non-mechanical detection of the optional handset in its stowage

OPTIONS

The **TUFTEL 2311** can have a Handset as well as a Headset (T2300)

The **TUFTEL 2311** can offer a variety of Hooters/Sounders and beacons for extra noisy environments

The **TUFTEL 2311** can have polyurethane curly cord to the headset.

The **TUFTEL 2311** can have a Logo to customer specifications

The **TUFTEL 2311** can be supplied in other attractive colours (consult factory)
