

Telephone Components - Enclosures

Enclosure without Keypad - Type A (Standard & Heavy Duty Versions)

Standard Type A Enclosure - The “A” enclosure is a robust enclosure originally designed for use in weatherproof telephone applications, and is commonly used in industrial & transport applications etc. The standard enclosure is made of durable Polycarbonate / ABS blend and the colour is normally orange although it can be specified by customer request. It is normally drilled to take either a metal or a curly cord.

Heavy Duty Type A Enclosure – The heavy duty “A” Enclosure is available in a very solid heavy-duty plastic with specifications as follows

- Enclosure moulding produced from a flame-retardant plastic
- Enclosure colour orange although it can optionally also be supplied in various colours
- Weight = 1 Kg.
- Dimensions approx. - Length 250mm, Width 200mm, 125 Deep.

Enclosure with Keypad - Type A (Standard & Heavy Duty Versions)
